CONFERENCE OBJECTIVES

Participants will:

Explore, in depth, the effects of domestic violence on families and the development of children during their critical years.

Be able to differentiate between various types of family violence and the cycles of abuse, power and control.

Understand the red flags and the lethality factors.

Understand the impacts of intimate partner and family violence on early development, from in-utero growth through the early years of life.

Understand the signs that a child may have witnessed violence in their home or are victims of abuse.

Understand how to have conversations with families regarding domestic violence.

Learn safety planning guidelines as well as community supports and resources available to families.
